

# How do I set my extension to handle calls if no one answers?

16 Thu, Jan 28, 2021 Call Features

## Question

How do I set my extension to handle calls if no one answers?

## Answer

If no one is there to answer a call and someone is calling your extension; you are able to set how your extension handles that call.

In the MAXcore 2.0 portal, you can use the Ring No Answer feature for your extension. With Ring No Answer, you can select a destination for that call to be routed to. The destination can be the voicemail for your extension, a different extension or another phone number.. You are also able to select a destination based on a schedule and a destination off schedule as well.

- To set a destination using the Ring No Answer feature:
  - Navigate to the MAXcore 2.0 portal; and once you are logged into the portal, select Extension from the navigation menu on the left.
  - Search for your extension and click on the extension.
  - Go to the Call Handling tab on the Extension Details page.
  - Look for the Ring No Answer Area and you will be able to enter the extension or extension voicemail (2254 or \*2254) or phone number you want a call to route to.
    - i. A brief note - Activation of Call Forwarding will take priority over other call flow functions (such as Simultaneous Ring and Call Handling).
    - ii. Scheduled Destination - You are able to choose a destination to have a call route based on a custom schedule that you create in the Ring Busy area.
    - iii. Unscheduled Destination - You are able to choose a destination to have call route route outside of custom schedule created.

## Ring No Answer

Activation of Call Forwarding will take priority over other call flow functions (such as Simultaneous Ring and Call Handling)

+ Add

Day Range	Time Range	Action
-----------	------------	--------

To create a schedule:

- Click the add button  under Schedules in the Ring No Answer area. This will bring you to the Schedule Details section.
  - i. Call Handling Type- You will choose busy for the Ring Busy feature or no answer for the Ring No Answer feature.
  - ii. Start Day-select the day you want your schedule to start. We advise if you are creating a schedule for more than one day that you add each day individually such as Monday-Monday, Tuesday to Tuesday...
  - iii. End Day- Select the day you want your schedule to finish.
  - iv. Start Time- Select the time you would like your schedule to start for that particular day. All time must be in 24 hour time format (09:00 am- 17:00 pm).
  - v. End Time- Select the time you would like your schedule to end that particular day. All time must be in 24 hour time format (09:00 am- 17:00 pm).
