

# How do I know if my phone number is SMS capable?

46 Thu, Jan 28, 2021 Call Features

## Question

How do I know if my phone number is SMS capable?

## Answer

Phone numbers are SMS capable. By selecting the SMS option from the left navigation menu will take you the **Phone Numbers** page. It will list the phone numbers that you have enabled for SMS capabilities. This will only apply to the numbers that are assigned to your user profile. To see what other numbers have SMS enabled, you can navigate to the **Phone Number Management** page and check for the ☐ action on the same row as the phone number. Selecting the ☐ option will open the **SMS Log** where you can send SMS messages.
