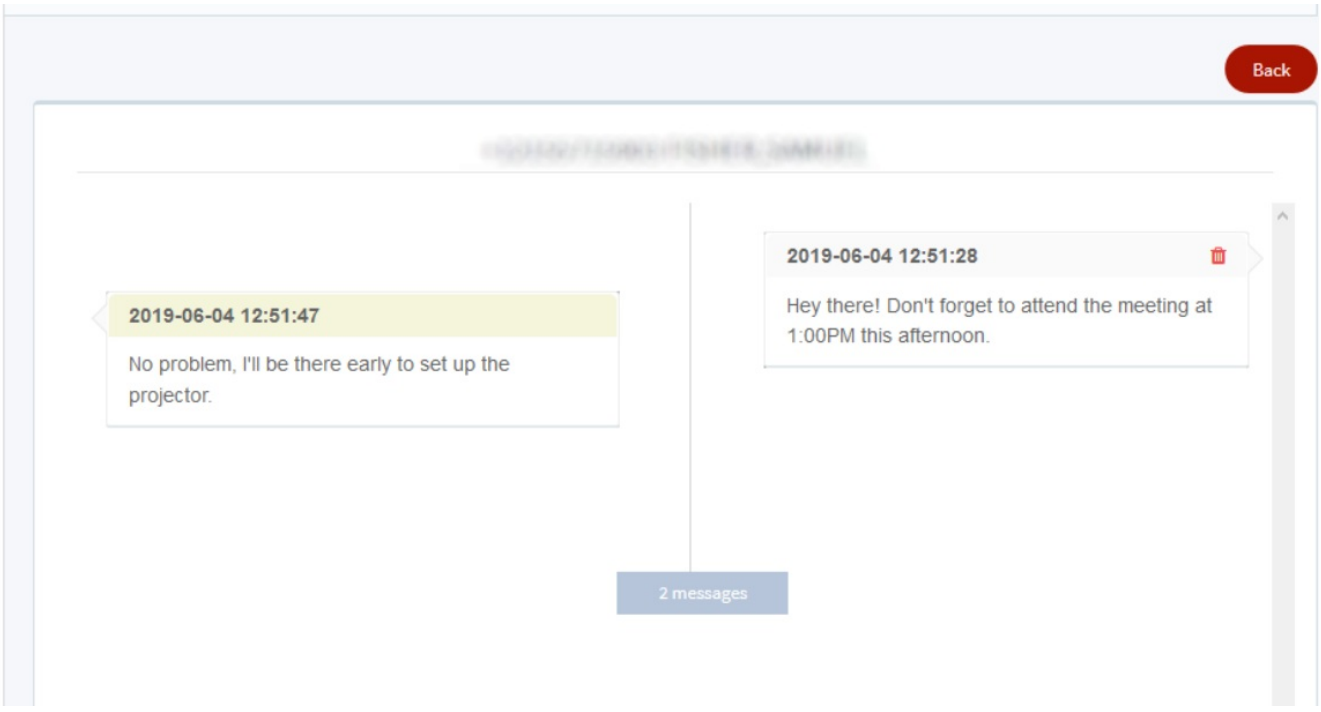
Question

Where can I find a display of all of the messages that were sent and received between another SMS enabled phone number and yourself?

Answer

From the **SMS Log** page you can press to open the **Conversation** page which will display all of the messages that were sent and received between the recipient and yourself. Each message is marked with the date and time the individual SMS message was sent or received. Additionally, you can respond to message as well from this page.



Once a message has been written you can press the button to send the message to the receiving number.
