Question

How can I update where I can make international calls to?

Answer

The Intl ACL (International Access Control List) tab will display a list of countries selected and available for international calling. A large list of available countries is present to be selected as countries that can be called. To add a country, click on the one you would like to move over and click the  to place it in the Selected Countries table. If you would like to remove a country, click the  to place it back into the Available Countries table.

The screenshot shows the 'International ACL' section of a software interface. At the top, there is a navigation bar with tabs: 'Voices' (selected), 'Holidays', 'SAC Config', 'Directories', 'Intl ACL' (selected), 'VM Distribution', 'Blacklist', and a dropdown arrow. Below the navigation bar is a title 'International ACL'. The interface is divided into two main sections: 'Selected Countries' on the left and 'Available Countries' on the right. The 'Selected Countries' table contains the following list: Canada, France, Guatemala, Ireland, and United Kingdom. The 'Available Countries' table contains the following list: Argentina, Aruba, Australia, Austria, Bahamas, Bahrain, Bangladesh, and Barbados. Between the two tables are two sets of buttons: a left-pointing arrow and a right-pointing arrow, which are used to move countries between the lists.

Selected Countries

Countries which have been chosen from the available countries on the right side and which can be called.

Available Countries

Countries that are available to be chosen and moved over to the authorized list of selected countries.
NOTE: Only users with the customer Admin role have the ability to make adjustments to the Intl ACL.
